

Support Coordination (SC) is a central point, from which services are identified, accessed and coordinated. We provide SC services to individuals with Intellectual/Developmental Disabilities. We assist individuals/families in locating services/resources, monitor service provision, and in understanding their rights and entitlements. In addition, SC also provides advocacy, support and information that facilitate independence in the individual's community.

SC uses a person centered planning process in developing, implementing and maintaining an Individualized Service Plan (ISP), which is reviewed every six months. SC focuses on keeping accurate and current record on service coordination activities and other services provided to the family
