“

The services over the past six months have been incredibly helpful. We've noticed significant progress, particularly in improving eye contact, responding to requests, and following directions.”

- S.M., a delighted parent

Progress you can see. Support you can feel.

Life-changing ABA therapy with results you'll recognize in your child and your day-to-day life.

The proven path to your child's success:

Collaborative, family-friendly services

Constant progress tracking & updates

**Now accepting new clients throughout
NEW JERSEY!**

Guided by data. Driven by heart.

Evidence-based care delivered with compassion & consistency to help your child learn, grow, and thrive.

What Caregivers Want to Know

Helping parents find their best way forward when life takes an unexpected turn

What makes Attain different from other ABA providers?

We take a unique approach to every individual and build on what our learners are already good at to help them get to and stay where they want to be.

How do you ensure your services are effective for my child?

With weekly clinical leadership meetings and program reviews, we constantly assess your child's progress, ensuring that our services are helpful and meaningful.

How much input do I have in determining goals?

As much as possible. We foster collaborative relationships with our learners and their families so that our shared goals, procedures, and outcomes have the greatest impact.

How do you take my child's individual wants and needs into account?

Your child gets a customized learning plan, leveraging their strengths to maximize our gains. Their plan grows and changes with them in response to their ever-evolving needs.

When will we finish services?

We work with our families to determine the desired outcomes during the assessment process. This informs everyone about what we're working toward and how close we're getting to accomplishing those goals.

With you from point A to all your child can B

The process is simple:

1. INTAKE

We'll confirm your eligibility for services

2. ASSESSMENT

A BCBA will identify your child's needs

3. TREATMENT PLAN

Targeting specific skills & behaviors

4. SERVICES

Ongoing & consistent services to achieve desired results
