

BEHAVIORAL ASSISTANT PARENT COACH

Behavioral Assistant Parent Coaching Program is a 12-week program designed by PBS. This program is designed to enhance parents ability to identify their childs strengths, and use them along with behavioral modification techniques, and positive support strategies to transform their child's behavior/challenges.

During this 12-week program, the parent will learn how to foster behavioral modification through interactive weekly sessions facilitated by a behavioral assistant. The Behavioral Assistant works closely with the parents or caregivers in order to design effective modeling strategies and techniques applicable to their dynamics.

Each one-hour session will include role play and other exercises involving the entire family in efforts to uphold the importance of the wrap around model. All materials and guided supporting homework are provided and tailored to the family's specific needs.
